### **Germany - advokatfirma I de**

advokatfirma I de is a law firm with its office in the old heart of Berlin at the Kurfürstendamm. Our firm has been recently established to meet the growing demand of international clients wanting to buy real property in Germany, focussing the Berlin market where we have an in-depth expertise on prices and conditions. Additionally we are legal advisors for our clients, regarding questions of corporate and commercial law and all aspects of their business here in Germany.

There are seven lawyers engaged in our law firm who speak additional to English, several Scandinavian languages. With the founder and partner Hans-Oluf Meyer the law firm is even able to present a lawyer of both German and Danish Commercial law with long experience in both German and Danish commercial law practise and business culture. He has successfully transferred the Scandinavian way of team-work into our German law firm and we are therefore very glad to present a high standard both concerning our reachability towards our clients as well as our legal advice, as our cases are regularly surveyed by more than one lawyer.

The character of today's legal marketplace means it is rare that a client's business is limited to German law. Many businesses expand throughout Germany. Being engaged into an international network and working on cases concerning cross-border law cases, especially all over Europe, is a matter of course and a pleasure to us. Cross-border legal advice can only be provided when people from different countries work together. Therefore, advokatfirma de has close connections to colleagues from other countries in international in a network of lawyers operating over Europe and North /South America.

Membership of EuréseaU has provided the firm the opportunity to network with international attorneys and in turn connect its clients to global legal support. We have been able to refer our clients to good attorneys in the network, who we actually know and with whom we have spent a significant amount of time. As a result, these referrals are made with confidence knowing that our clients will be well served. The personal relationship between parties in the EuréseaU network has led us to be able to obtain business for those firms and vice versa. These referrals enable us to win new business and retain existing clients. Only two weeks ago we referred one of our German clients, with companies in Germany and Denmark, to our colleague in England regarding starting up a company in UK.
